

## API integration

**We have documented APIs for the most advanced integrations.**

Feel free to request additional information about this option.

**auth\_key**

The **auth\_key** that was given in response to `/api/login`

**service\_type:**

Type of the service. Should be **1** for point -to-point transfers or **2** for hourly disposition service.

**Note:**

The minimum contractible hours are 4. Disposition services with less than 4 hours could be booked up but 4 hours will be invoiced.

**segments**

An array of *JSON-encoded Object* containing all the stops of the service. The first is the *pick-up* and last one is the *drop-off*.

Segment object must contain the following information:

**name:** Location name (El Prat Airport Barcelona)  
**lat:** Latitude (41.297445)
