

What is Drivania's e-booking portal?

• **Users and accessibility**

- User access can be arranged in the form of individual or group accounts.
- Group accounts can be accessed by multiple users.
- The number of users per account is unlimited.
- All the users of an account share the information for requests.

• **Communication:**

Ride requests that are processed via the portal will generate an e-mail message that is sent to the user who submitted the request, as well as to the general e-mail address for the account, if applicable.

• **Web interface:**

Drivania's e-booking portal is a web interface that allows users to manage their requests in a few seconds. This means that users must undergo a brief training in order to operate the system's features in an agile and autonomous manner.
